

Gain Insights On Your Targeted Audience!

Google Consumer Surveys (GCS) is a market research tool that allows you to learn more about consumer behavior and gain insights on your targeted audience. This platform allows you to make well-informed business decisions backed by research based on your specific needs.

The survey questions that we develop will appear as content that is native to the sites your target visits. The site visitors will answer your questions in exchange for access to the website's content.

How Does it Work?

GCS can target general population, android smartphone users, or our remarketing audiences. By selecting remarketing, your research data will be broadcasted to our tagged audience on Google Display.

Randall-Reilly's Tagged Audiences

Trucking
3,217,000

Construction
1,940,000

Additional audience segments
(i.e., owner-operators, heavy construction contractors) available on request.

Question Formats

Your survey will have a limit of 10 questions.

A Single Question Format

Example: Do you have a valid CDL A?

Yes No

B Multiple Choice

Example: When considering a new driving opportunity, what aspect(s) matters most?

Check all that apply

- Home time
- Pay
- Respect
- Equipment
- Number of miles
- Sign-on bonus
- None of the above
