

RigDig truck history reports protect you and help make smart purchasing decisions.

Every truck has a story to tell. It could have a junk title, a history of poor maintenance or even been involved in an accident. With data from the most credible and reliable resources available, protect yourself using vital intelligence in an easy-to-read report.

A RigDig truck history report tells you:

Reported accidents

Reported inspection violations

Title and odometer brands

Reported insurance claims

Carrier/owner history

And much more

RigDig protects your purchase decisions.

Truck History Reports

RigDig truck history reports are powered by the most comprehensive and trusted information sources available.

RigDig Business Intelligence is the primary source for vehicle specifications. Additionally, it provides all the labor and resources to tie a VIN with the associated carrier.

EDA is RigDig's primary source of Uniform Commercial Code (UCC) related liens and terminations.

The Federal Motor Carrier Safety Administration provides RigDig with federally recorded accidents, post-accident inspections, inspection violations and carrier information.

AutoDataDirect, Inc.

RigDig integrates information from junk yards, salvage yards, auto recyclers, insurance carriers and state titling agencies from the National Motor Vehicle Title Information System.

Testimonials

"RigDig helped me avoid buying a questionable truck. I ran a RigDig truck history report which showed that the odometer had been tampered with. RigDig runs fast, too. It's great."

John T. (Fleet Owner)

"I wouldn't buy a truck without getting a report. Would you buy a \$100,000 house without checking it out? RigDig reports are a great thing."

Tony M. (Owner-Operator)
